ABOUT US

Presswood is the largest European manufacturer of disposable pallets. The first Presswood pallet (named INKA Pallets) was made in 1971 in Siegertsbrunn just outside Munich. This production facility was moved to the Netherlands in the early eighties. Today Presswood pallets are being made at two manufacturing locations in Europe and two in the USA.

Presswood pallets are available in all standard sizes, ranging from a ¼ pallet to the CP3 format.

Distribution is carried out via an area-wide distribution network with over 160 sales outlets in Europe and numerous other countries worldwide.

Presswood pallets are manufactured according to a guaranteed pest-free process. Therefore the pallets are preeminently suitable for worldwide exportation as a universal cargo carrier. Potential quarantine regulations of various countries (such as ISPM15 / NIMF 15) need not be taken into consideration when using Presswood pallets.

THE VIERHOUTEN GROUP

The Vierhouten Group is the collective name for several companies who provide smart solutions for packing and transport. The combination of what these companies have to offer is often the answer to many questions that the industry is looking for.

To find out about other companies within the Vierhouten Group please visit www.vierhoutengroup.com.

OUR BROCHURE

Presswood pallets are 100% PEFC™ certified. With 39 endorsed national certification systems and more than 300 million hectares of certified forests, PEFC™ is the world’s largest forest certification system. PEFC™ is the world’s largest forest certification system. The standards seek to transform the way forests are managed globally – and locally - to ensure that all of us can enjoy the environmental, social and economic benefits that forests offer. PEFC™ is an umbrella organization. It works by endorsing national forest certification systems developed through multi-stakeholder processes and tailored to local priorities and conditions.

A2B-online offers a professional and flexible trailer, container and shipping service for your full and part loads from and to Great Britain. From the Benelux and Germany we offer a daily service based on our own trailers and containers. www.a2b-online.com

FSC®

Presswood pallets are FSC® Recycled 100%.

More and more people are interested in where products come from, how they are made, and their impact on the world around them. This means eco-credentials are playing an increasingly big role in consumers’ and businesses’ decisions about what they buy.

So, if you are either a forest owner or manager, or a business that produces or trades forest products, it becomes even more important to show that you operate in an environmentally, economically and socially responsible way.

FSC® certification is designed to help you do just that. It guarantees your customers that the FSC®-labelled product they buy has come from a forest and supply chain that is managed responsibly.

ISPM15

International Standards for Phytosanitary Measures.

This standard describes phytosanitary measures to reduce the risk of introduction and/or spread of quarantine pests associated with wood packaging material (incl. dunnage) made of coniferous and non-coniferous wood, in use in international trade.

Presswood pallets are being classified as Processed Wood Material. Products that are a composite of wood construction using glue, heat and pressure, or any combination thereof.

In the ISPM 15 guidelines on page 8, 18 / Guidelines for regulating wood packaging material in international trade under point 2, second section, stands the explanation why the Presswood pallets does not need to be treated against pests. Wood packaging made wholly of wood-based products such as plywood, particle board, oriented strand board or veneer that have been created using glue, heat and pressure or a combination thereof should be considered sufficiently processed to have eliminated the risk associated with the raw wood. It is unlikely to be infested by raw wood pests during its use and therefore should not be regulated for these pests.
